Specialty drugs are used to treat complex conditions

Specialty drugs are prescription medications that require special handling, administration or monitoring. These drugs treat complex and chronic conditions, including:

- Cancer
- Chronic kidney failure
- Multiple sclerosis
- Organ transplants
- Rheumatoid arthritis

There are two ways to fill specialty drug prescriptions

You can fill prescriptions for specialty drugs at a retail pharmacy, but not all pharmacies will dispense specialty drugs. Call your pharmacy in advance to verify that it can fill your prescription.

Blue Cross Blue Shield of Michigan and Blue Care Network also offer mail order service through Walgreens Specialty Pharmacy. Walgreens provides you with specialty pharmacy mail order services and support programs.

If you have questions about BCBSM's and BCN's specialty drug program, please call Walgreens Specialty Pharmacy at 1-866-515-1355 or visit the website at walgreensspecialtyrx.com*.
